

Projecting a Device via on the Touch Screen

1. **Power on** and **Log in** for the Touch Screen. You may need to connect the Ethernet cable and then log in to UC Davis CAS for the first time.

 is located at the bottom-right frame, and another on the Dell computer behind the touch screen at the right side.

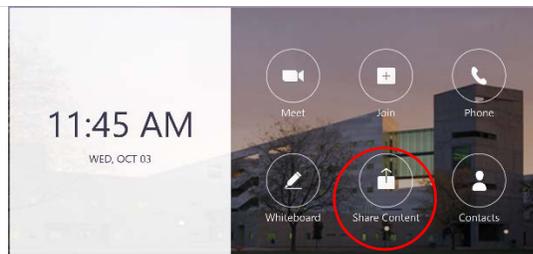

2. **Power on** your laptop, Chromebook or other devices.

3. Click the **Start Zoom Rooms** shortcut on the desktop.

4. Select the **Share Content** button and get the **9-digit meeting ID** under **User Browser** in the right side of the screen.

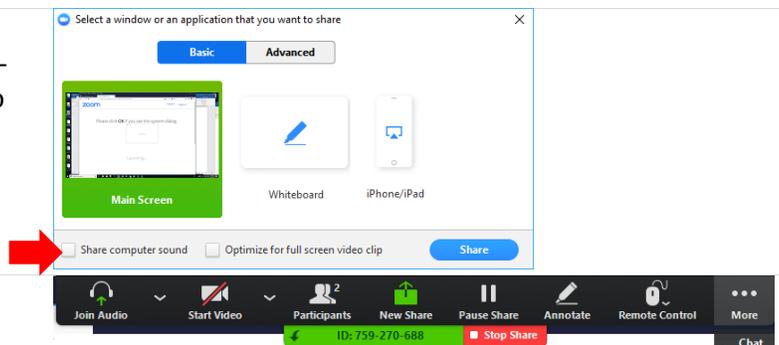

5. **Share and Show Your Device via Zoom.** On your device, launch a browser, type <http://share.zoom.us>, enter the share ID key, and press **Share**. If it is the first time to use Zoom, There may be more steps e.g., adding (downloading) a plugin and opening link.

Note: The user may need to enter a password to download the Zoom audio plugin onto his or her device.

6. Select **Main Screen** or another content, check **Share computer sound** in the lower-left corner to play audio from PPT or video files, and click **Share** in Zoom.

(Note: You may also need to **Start Audio** to show video with sound in other places).

7. Click **Stop Share** to finish. Touch the big screen and touch **Exit** in the lower-left corner to quit Zoom application.

Note:

If the video does not show smoothly, it may be due to a slow WIFI speed. Copy the video clips to the Windows 10 computer attached to the touch screen and try again.
